Art Unit: 1646

- 1) Claims 20 to 23, 25 and 27 to 33 are pending in the instant application.
- 2) Any objection or rejection of record which is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.
- 3) The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 4) A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09 October of 2002 has been entered.
- 5) Claims 20 to 23, 25 and 27 to 33 stand rejected under 35 U.S.C. § 101 because they are drawn to an invention with no apparent or disclosed specific and substantial credible utility for those reasons of record in section 4 of Paper Numbers 8 and 12. Applicant has again traversed this rejection on the premise that a protein encoded by the claimed nucleic acid has a disclosed diagnostic utility. The text on pages 4 and 60 of the instant specification disclose a utility for antibodies to a protein encoded by the claimed nucleic acid in a diagnostic utility. A diagnosis is the determination that a particular disease or disorder is present in a system by observing the presence of signs and symptoms in that system which are usually associated with that disease or disorder. The assertion in the instant specification that the protein described therein has diagnostic utility does not constitute a specific assertion of a practical utility because

Art Unit: 1646

the specification fails to identify any particular disease or disorder which one could diagnose by the detection of the disclosed protein. The specification further asserts that the disclosed antibodies are "diagnostic" for the presence of monocytic cells or PLBs. The presence of monocytic cells or PLBs in a human does not appear to constitute a recognized disease or disorder. Therefore, the detection of a protein in a sample is not diagnostic because it is not a condition disclosed as being associated with a particular disease or disorder.

6) Claims 20 to 23, 25 and 27 to 33 stand rejected under 35 U.S.C. § 112, first paragraph, as failing to adequately teach how to use the instant invention for those reasons given above with regard to the rejection of these claims under 35 U.S.C. § 101.

7) Applicant's arguments filed 09 October of 2002 have been fully considered but they are not persuasive..

8) All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1646

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
